3.2.:

PROJECT/NETWORK SUPPORT

3.3. Summary

Focusing on the issues of integrative learning contents within the early childhood education, the project “Viva la musica” highlights music as effective means for harmonious and comprehensive development of children.

The purpose of the project is to promote integration of music into the early childhood education curricula in the Nordic and Baltic countries. The partners from 2 Nordic and 3 Baltic countries (FI, IS, EE, LV, LT) have united to collaboratively develop teaching resources, i.e., methodological recommendations and descriptions of musical activities, to carry out support activities for early childhood educators and to acquire diverse methodological approaches for integration of music into the early childhood education curricula.

The co-operation between pre-schools (IS, EE, LV, LT), the Music Institute (FI) and a Professional early childhood music teachers’ association (LV) focuses on active involvement of children, parents and teachers in varied local and intercultural musical activities as well as motivated exchange of experiences among teachers.

During the project, methodological recommendations on using music in the daily educational process will be developed and descriptions of different musical activities will be collected and published.

Joint teachers’ training and job shadowing in all partner institutions will be carried out within the project.

Participants will be involved in creative workshops on traditional and modern music. Children, parents and teachers will express their creativity by making musical instruments from different materials.
